

## **PET/CT DOSES**

**Radiopharmaceutical dosages for H.O.P.E. Imaging  
will be as follows:**

Tumor Imaging 10-20-mCi F18 FDG

**Clark's Rule will be utilized for calculation of pediatric doses.**

$$\frac{\text{Child's weight in lbs.}}{150 \text{ lbs.}} \times \text{Adult Dose}$$

**NOTE: Any deviations from the above dose ranges must be approved  
In writing by an authorized user (radiologist). Failure to comply  
with this directive will result in disciplinary action.**
